

Start

- 1- Receives group project assignment from professor
- 2- Learns that she can choose her own dataset

Choose

- 3- Googles to find projects with interesting datasets
- 4- Looks at known companies that offer cool use cases
- 5- Has difficulties finding a project that meets her criteria
- 6- Finds a project through network and gets approval

Work

- 7- Splits project tasks between all team members
- 8- Struggles with her internal group dynamics
- 9- Has difficulties for lack of expert mentorship

Present

- 10- Presents project to all of the class
- 11- Receives minimal questions and feedback from her classmates

I like that I can choose the data for this project

What will I learn? Will it look good on my resume?

Working with groups can be so hard!

I wish we had better guidance for this

"Classmates don't know what to ask or look for when [we're] presenting our findings."

Opportunities

To help Sofia find interesting projects that align with her goals

To provide Sofia with the soft skills and guidance she needs to achieve her goals
